

Common declaration regarding the Financial Supervisory Package

"The agreement on the financial supervision package reached between Council and EP foresees that through future legislation, additional supervisory powers shall be conferred on the European Supervisory Authorities.

The coordinators of the main political groups of the EP insist that the Authorities shall exert appropriate supervisory powers over entities with EU-wide reach. This shall include market infrastructure, such as trade depositories and central counter parties.

In the common market shared European infrastructures have to be subject to European supervision."
